

Asade Water Bikes

Sports and entertainment combined...

Your new habitat at sea...

WHAT TO DO?

3m Asade Water Bike (Single)

It offers excellent driving pleasure balanced with a width of 1.7 meters and a length of 3 meters.

You can take long-distance rides by pedaling at a low pace with Asade Water Bike.

You can go up to 15km per hour and compete with your friends with fast-paced driving.

If you use a water bicycle to keep yourself fit and lose weight, the cold surface of the water will make you sweat less and allow you to exercise for a longer period of time. You will also have fun doing sports.

It offers a more comfortable use on the water surface with a low noise rate since the sea bicycle does not have an engine. You will relieve your stress thanks to the sound of water.

WHY ASADE WATER BICYCLE ?

➔ SECURITY

Safety is kept at the highest level in Asade Water Bikes.

- * * Stitched fabric, which is also found in our Balloons and Zodiac boots, was used.
- * * Each balloon is divided into 2 air chambers. In adverse cases, you may proceed with the other side

The life vest comes with the product.

Product strength analysis has been done

- * * The product is completely analyzed and designed in accordance with difficult conditions. Engineering calculations were made at each stage. Each piece was analyzed.

➔ DRIVING AND COMFORT

- * * It offers a balanced ride thanks to its catamaran structure and dimensions.
- * * Driving is very enjoyable on our bikes. The propeller system rotates with a minimum force of 300gr to the pedal. In the system all your energy is transmitted to the impeller as the torque loss is very low.
- * * In the gear system, you can use it at any speed with a ratio of 7.5/1. You can go up to 15 km/h (6 mph) if you drive at speeds.
- * * You can reversing. You brake by turning the pedal upside down.
- ** It offers excellent maneuverability as the propeller system also rotates when turning

WHY ASADE WATER BICYCLE ?

➔ INSTALLATION and DISASSEMBLY

Asade Water Bikes are installed with 4+4 butterfly screws in total.

* *Product installation shall not exceed 15 minutes including balloon inflation.
Dismantling is 5 minutes.

* * There is a propeller protection system in the system. In case of hitting an obstacle the propeller falls into vain and rises upwards.

The pump required during installation comes with the product.

It comes with the product with wrench set

It is described in detail in the installation booklet.

➔ CARRYING and TRANSPORTING

* * There are 3 models of the product. Single bicycle is 30kg. Double bikes are 40kg and the model with a sunlog is 45kg. Thanks to its lightweight structure, it can be easily carried.

* * It does not take up space with the foldable propeller system.

* * Your bike can easily fit in the trunk of your car if the balloons blow down

* *The product comes with a special parcel. For long term storage, you can use this parcel
